ARCHITECTURE

MOTION PLATFORM QS-CH2

The QS-CH2 provides the most precise traction loss feeling by moving the entire cockpit. The motion system is based on the world's fastest linear actuator's technology, which delivers an incredible level of instant feedback to the driver. This motion platform is suitable for Rally, Drift and any racing simulations. By providing the oversteering effect, the platform can be used effectively for real and sim racing drivers training making them feel what happens to the front and the rear of the vehicle.
